

Technology Roadmapping: Engineering Industry Workshop

Time and Date: 3.00pm – 6.00 pm on Wednesday 7th March 2012
Venue: University of Strathclyde, Graham Hills Building (Room 512),
50 George Street, Glasgow G1 1QE

We are very pleased to invite you to our Engineering Industry Workshop on Technology Roadmapping (TRM). TRM is a powerful technique for managing business processes in developing products and services. TRM is especially useful in exploring and communicating the dynamic linkages between technological resources, organisational objectives and the changing environment (Phaal, Farrukh, & Probert, 2004).

At our workshop, TRM practitioners will be sharing their experiences in different industry sectors. The workshop will capture best practice from large companies, inform SMEs on how to engage with TRM and deliver real life case studies which SMEs can adapt to their own companies.

The programme:

Welcome and introduction

3.00-3.15: Introduction to TRM

3.15-3.45: The processes of TRM

3.45-4.15: Keynote speaker – Gerry Watt, Chief Executive at Electronics Scotland

4.15-4.45: Case studies

4.45-5.45: Scenario – facilitated analysis of case study

5.45-6.00: Summing up, lessons for your product and service development work

By participating in this workshop, you will gain:

- A state of the art review of TRM practices
- Lessons learned from experts who have practical experience in TRM
- Practical experience in working through a case study
- Lively discussion of managing product and service development
- Networking with networks and maybe establish partnerships or collaborations with others at the workshop

There is no charge for the workshop and refreshments will be provided.
