

A Bridge Over Troubled Water

Visual Documenting of the project's collaborative and community sites of knowledge exchange: 2016-2017

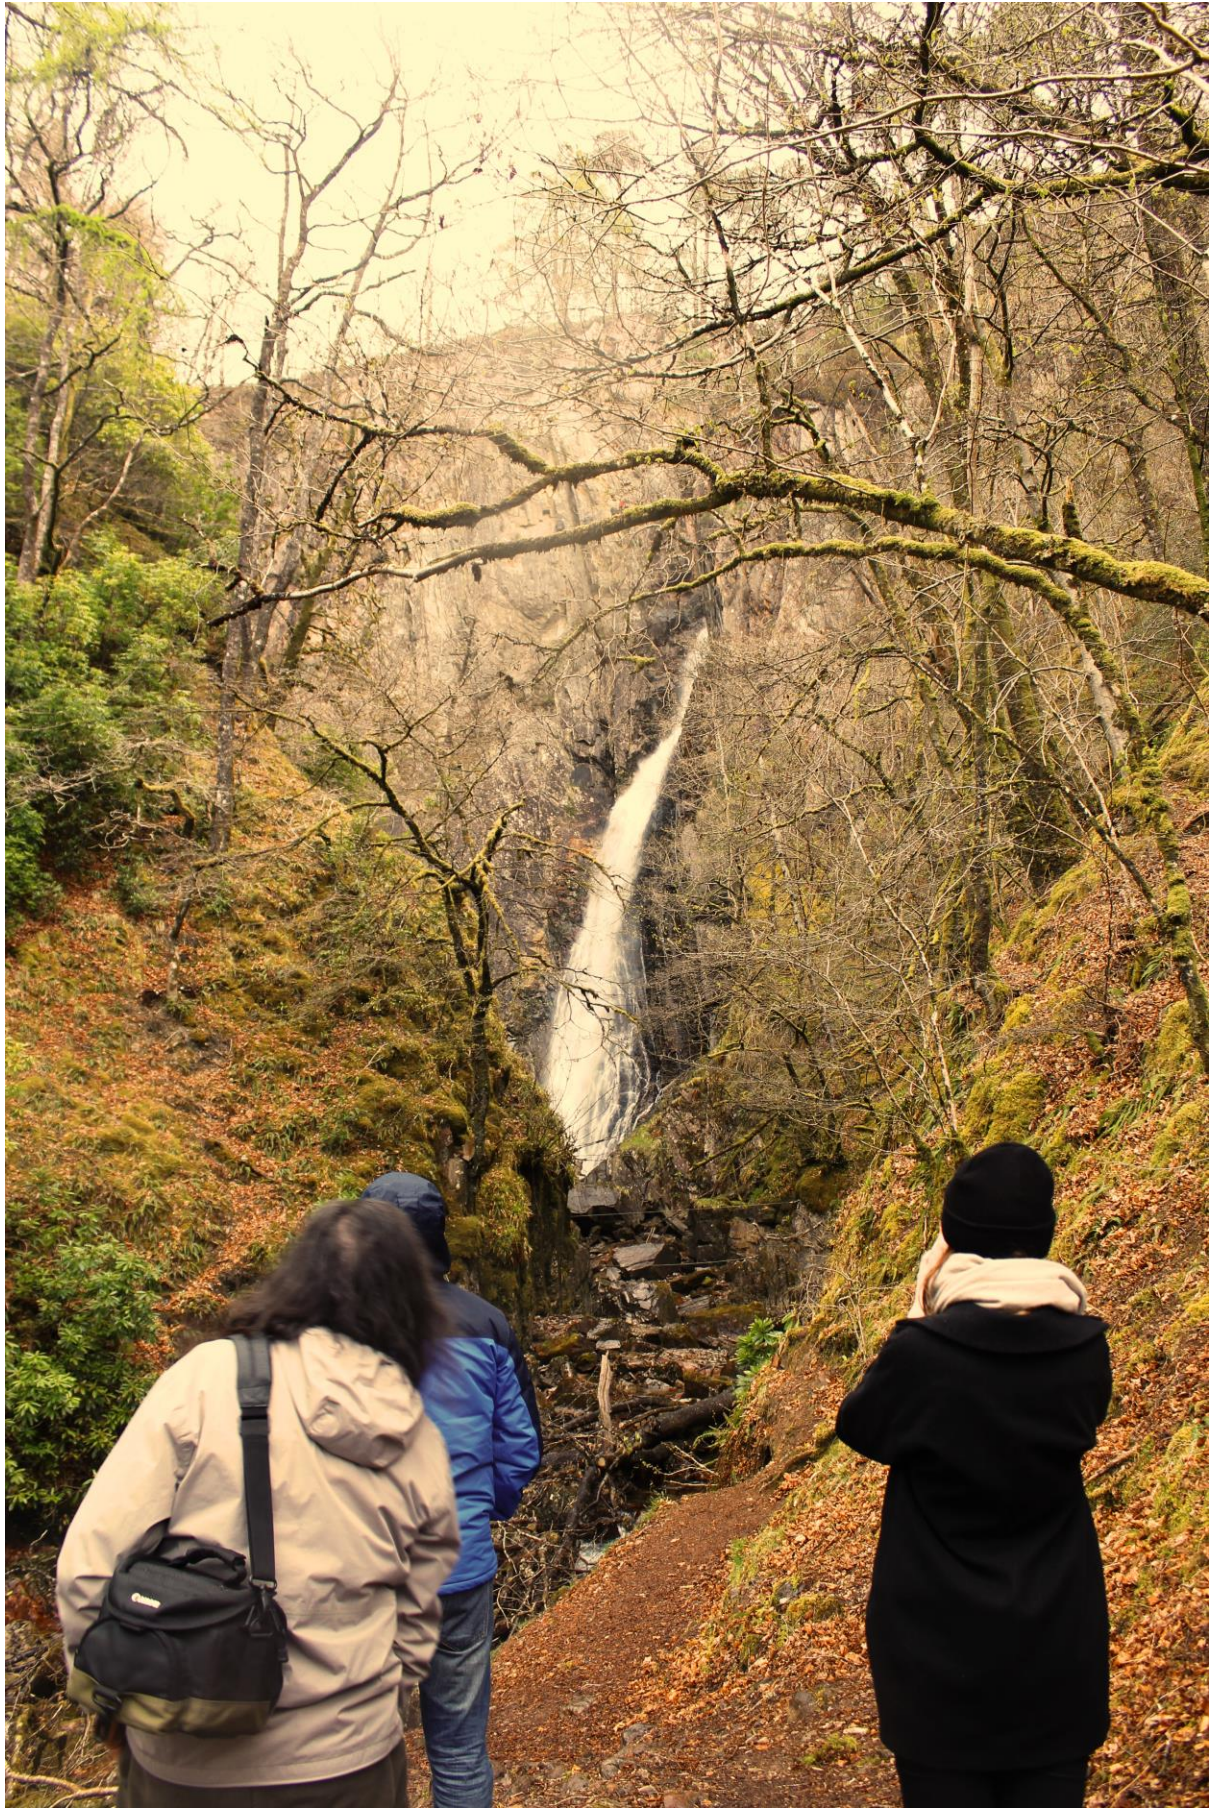

Various sites offered engagement on community renewable energy including the community of Kinlochleven, Lochaber; the Isle of Eigg community, Inner Hebrides; and West Whitlawburn community, Glasgow.

Various knowledge exchange events offered opportunity to share and disseminate the project and ongoing findings. A small selection of visuals presented here offer some sense of these various sites for exchange and community partnership involved in this project.

Kinlochleven walking workshop

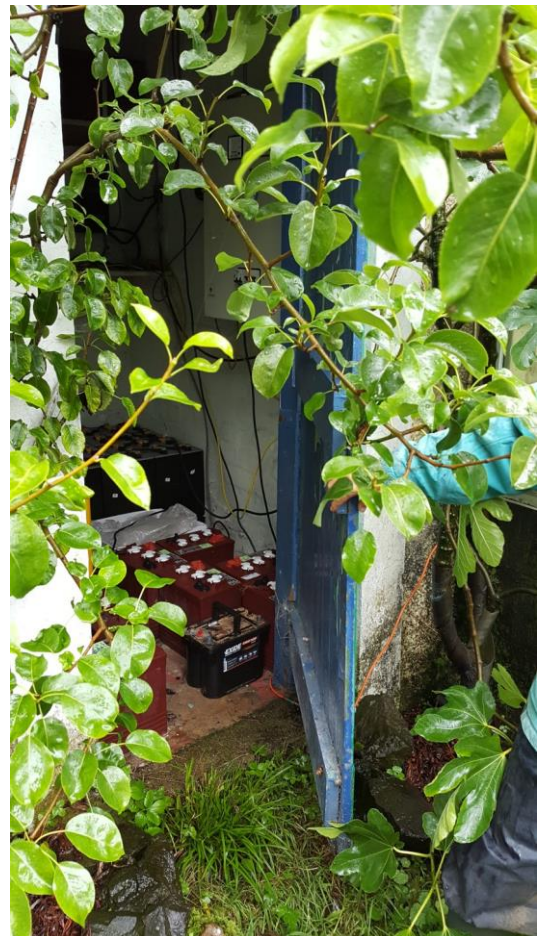

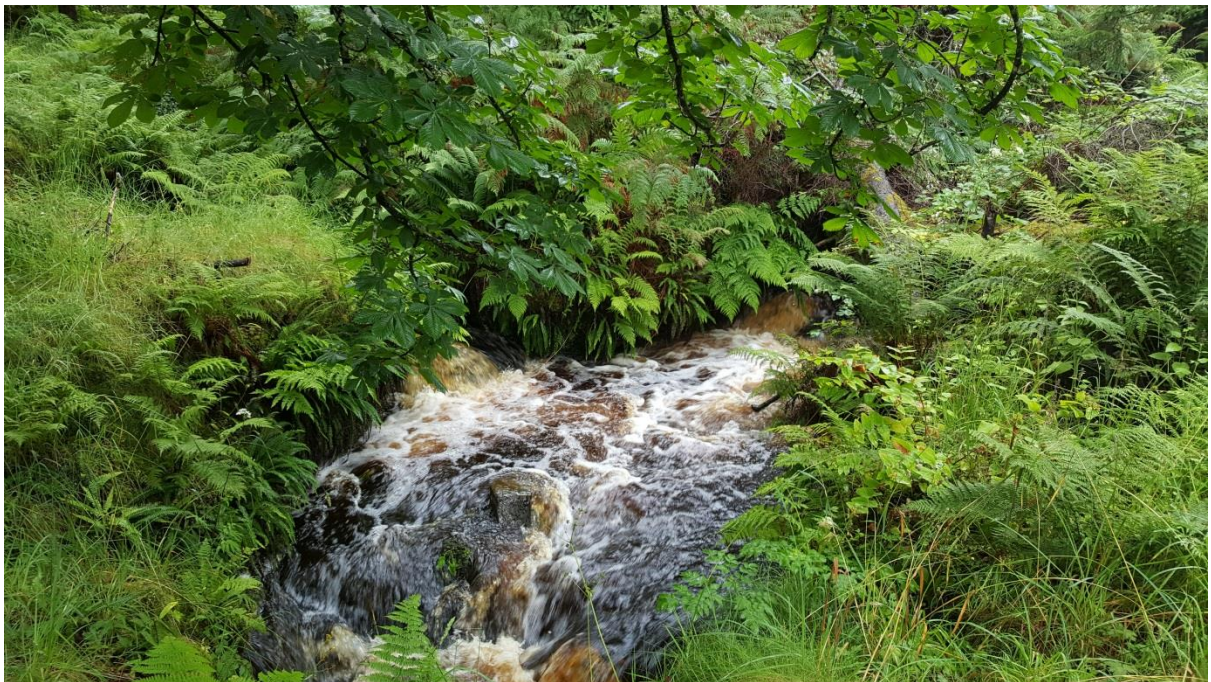

Eigg Walking Workshop

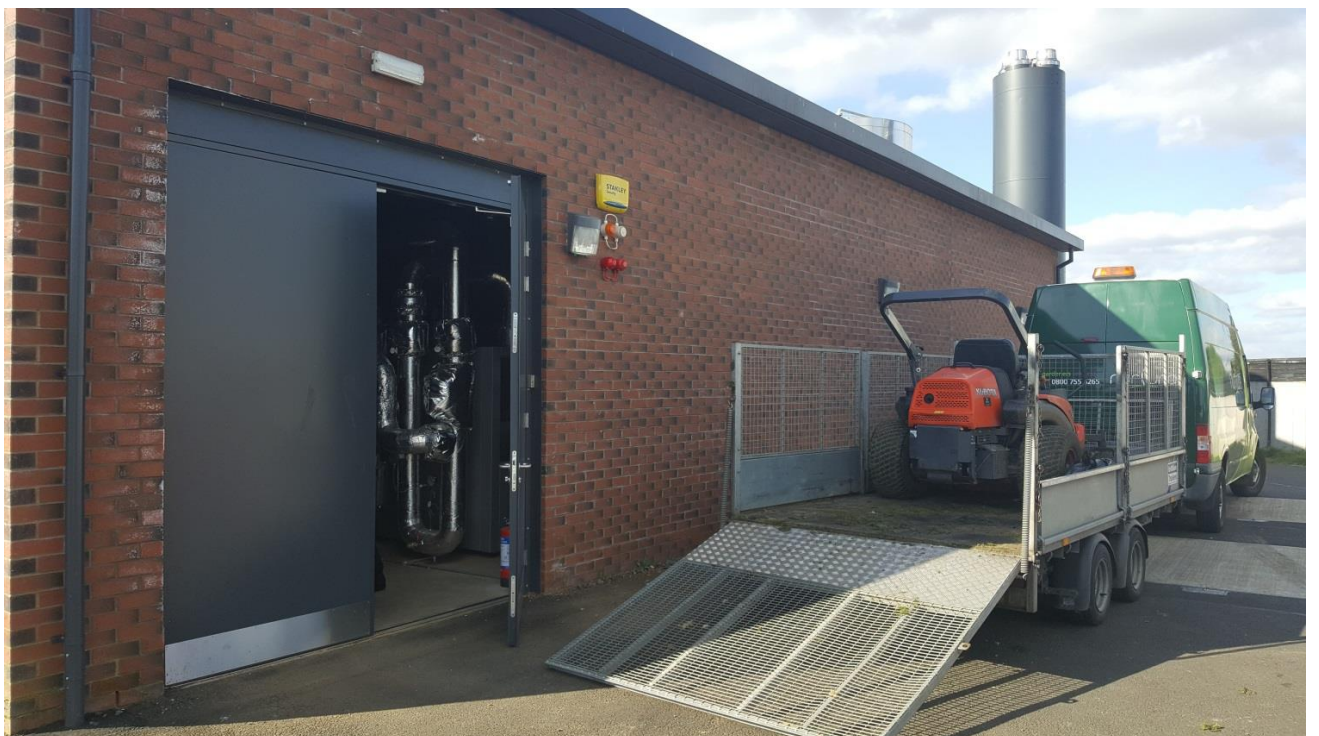

West Whitlawburn: walking workshop

Presentation to Our Land: Scottish Land Festival, including sharing of experience on energy and community knowledge exchange by representatives of Federation of Salaried Rural Workers SaoPaulo (bottom right)

September 2016 at GalGael Trust, Glasgow

Presentation to Engage Festival,
May 2017 at Engage event, University of Strathclyde, Glasgow
