# PEOPLE AND PLACE

**1 What are we trying to achieve?**

Share experiences  
Break down barriers  
Language  
"The"  
Good stories in media  
Inclusion  
Activities  
Join up  
Doorstep access  
Existing assets  
Skill Share

**2 What should we prioritise?**

Introduce supporting environments  
Flexibility of rooms  
Finding & developing champions  
Commitment to intergenerational spaces

Shared understanding  
Physical barriers  
overcome

**3 What questions should we ask?**

Where is the good news?  
What are the shared activities?  
Where do we locate/co-locate?  
How do we combat suburban loneliness?  
How do we create a safe environment?  
How can people get to places?  
What have we learned from COVID19?  
- And - what can we do differently?  
How do we make intergenerational design & work the norm?  
... How do we give it longevity?  
Who are the key people we need to speak to?

# BREAKOUT SESSIONS

**FEEDBACK AND IDEAS from OLDER PEOPLE**

# CO-CREATING TRANSNATIONAL OPPORTUNITIES FOR INTERGENERATIONAL PLACE-MAKING:

Towards developing an age-friendly and intergenerational living ecosystem

What does a living eco-system look like?  
over time

**Aim:** The aim is to improve the integration of older and younger people together in semi-public and public spaces towards through the conceptualisation of a living eco-system that is intergenerational, age-friendly, and supportive of opportunities for people as they age. The sub-aim is to enable older people to become more valued, connected and feel a sense of belonging in their community.

## Objectives:

1. To explore in Scotland, and learn from other countries, opportunities for intergenerational and age-friendly places and place-making: how they work, for whom and in what context, and what they fail to deliver.
2. To conceptualise and create a vision for an intergenerational and age-friendly living ecosystem with multi-generational stakeholders from across different global contexts, a range of disciplines and diverse sectors.
3. To examine multi-level constraints and facilitators of both internal and external environmental factors in terms of the individual, physical, social, service and digital landscape that shape age-friendliness and opportunities for intergenerational integration.
4. To develop an international, translatable community of practice to sustain the living eco-system concept beyond the remit of the research project, and, co-produce an intergenerational model-of-practice with and for older people.

**LANGUAGE**  
Cross-generational?  
\* Multi-generational?  
Inter-generational?  
\* Address inequalities?

↑ & younger & everyone in between!

## Questions:

1. What are the apparent and missed opportunities for integrating older and younger people in semi-public and public spaces at the individual, physical, social level and amidst changing digital landscapes?
2. What are the multi-level constraints for integrating older and younger people in semi-public and public spaces across cultures and contexts?
3. How can we harness international expertise and experience across disciplines and sectors, and existing community assets to co-create an age-friendly and intergenerational living ecosystem?

opportunities

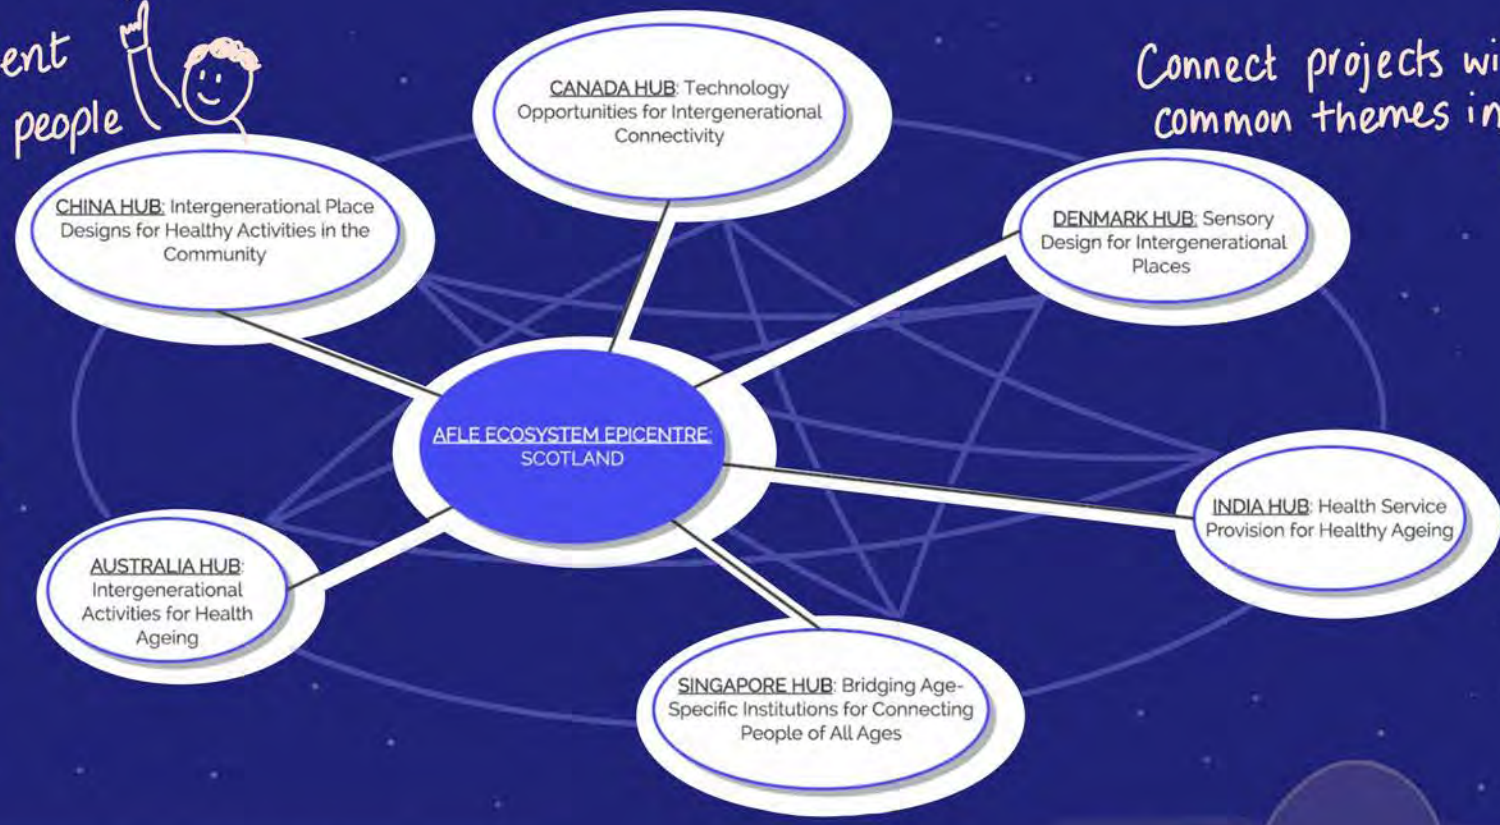

*Dementia friendly design*

*Stirling can help engagement  
↳ what makes people want to be involved*

*Connect projects with common themes in different countries*

- look for commonalities
- Older people should NOT be singled out

# CASE STUDY: PLANNING AID SCOTLAND

# AGE FRIENDLY LIVING ECOSYSTEM

**1** Include all voices in community consultation when planning

**2**

Support and training for all people when consulting to build confidence for creating inter generational places. Including key stakeholders & researchers.

**3**

Incentive from governments for creating intergenerational places and spaces such as community centres for social and economic (longevity Economy) and enhanced wellbeing for communities.

**8**

Balancing design and accessibility when creating intergenerational places and spaces.

**9**

Designing for wellbeing and the senses as a policy driver.

**10**

Consider organic versus prescribed development of intergenerational places and spaces.

**7**

Facilitating conversation with people who live in the community on how to create and maintain intergenerational places and spaces.

**4**

Building generation proofing into all aspects of the planning and design process.

**6**

Develop a model and guidelines for creating intergenerational places and spaces.

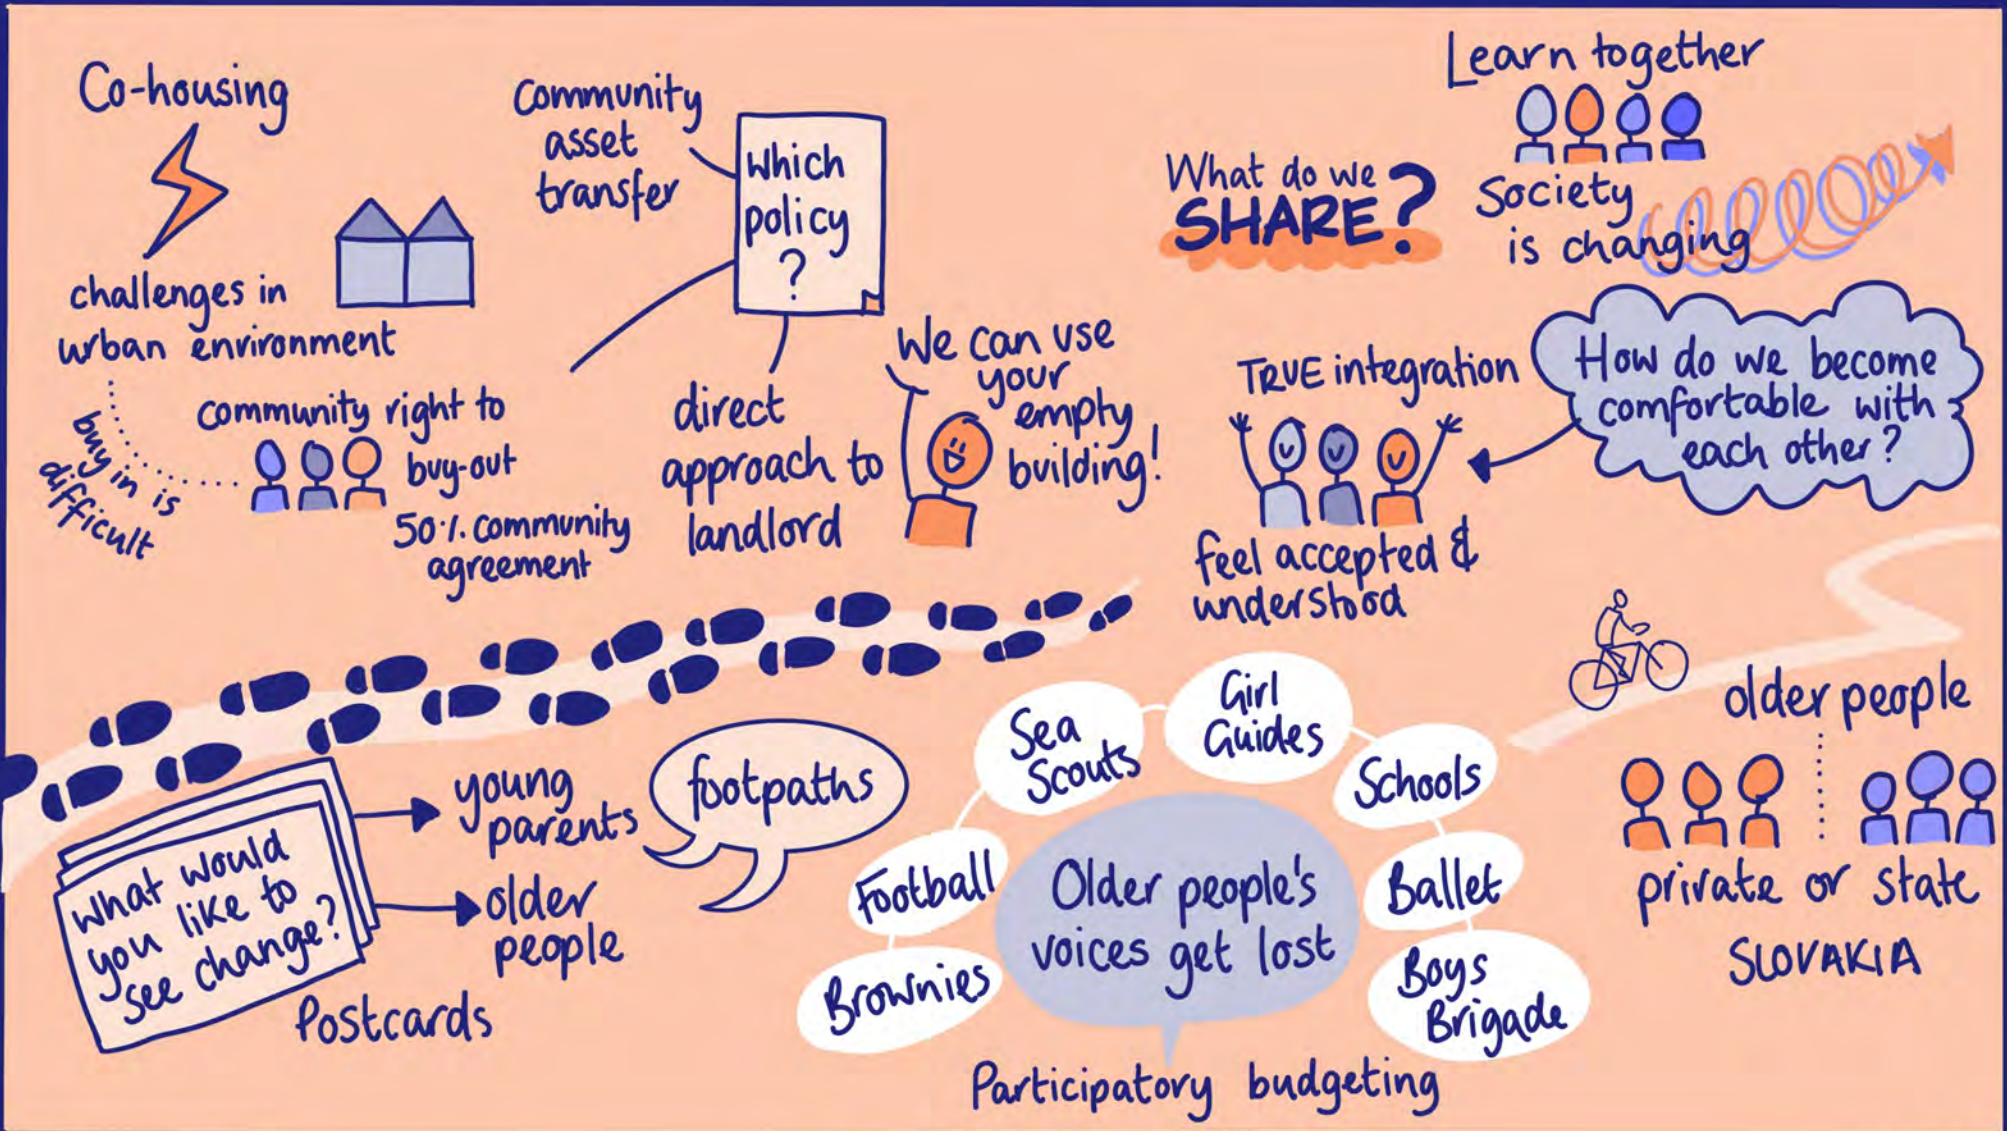

**5**

Having fun and making it fun when creating intergenerational places and spaces.
