

"Shifting paradigms for dementia: Involving people living with dementia across research, policy and practice".

Friday, 17th November, 10am-4:30pm Scottish Universities Insight Institute and James Weir Building University of Strathclyde, Glasgow

Workshop 2. Dementia, technologies and social inclusion

The goal of this programme is to 'shift paradigms' within dementia, by challenging current thinking and practice through collaboration and the involvement of people with dementia. This seminar series will forge partnerships between people with dementia, communities and universities in order to promote the sustainable development of dementia friendly communities, policy and research. Focusing on how people with dementia make use of technology to maintain independence, this second workshop will discuss user-led innovation in design and technology. We will use a practical focus to explore questions of ethics, (in)dependence, rights and technology for people with dementia.

10.00-10.30	Coffee/tea and registration
10.30-10.35	Welcome to the workshop from the Chairs
	Dr Diane Pennington, University of Strathclyde; Dr Grant Gibson, University of
	Stirling; Sue Northrop, Dementia-Friendly East Lothian
10.35-11.00	Introduction to assistive technologies for dementia care
	Gillian Anderson, Senior Technology Coordinator, Alzheimer Scotland
11.00-11.20	Technology-enabled care services for people living with dementia (recorded)
	Matthew Larivière, PhD Candidate, University of East Anglia
11.20-11.30	Break
11.30-11.50	The MindMate App
	Rogelio Arellano, CTO & Co-Founder, MindMate Ltd.
11.50-12.10	Some ethical issues around technology enabled care
	Andrew Eccles, Lecturer in Social Work & Social Policy, University of Strathclyde
12.10-12.30	Panel discussion with all speakers
12.30-1.00	Lunch
1.00-1.45	Keynote Talk - "Dementia care: What does the future look like?"
	Prof Roma Maguire, Professor of Digital Health and Care, University of Strathclyde
2:00-4:00	Parallel afternoon sessions
1. Fab Lab at	Strathclyde, James Weir Building, Room 310, 75 Montrose Street, G1 1XJ
	Hands-on "hackathon": Creative technologies for people with dementia
	Graham Murdoch, Lecturer in Design and Technological Education and Fab Lab
	Manager, University of Strathclyde (limited to 15 people)

2. James Weir Building, Room 410, 75 Montrose Street, G1 1XJ

Person-centred assistive technologies (TBC)

Dr Grant Gibson, University of Stirling

4:00-4:30 Wrap-up discussion: James Weir Building, Room 410

Dr Diane Pennington, Lecturer in Information Science, University of Strathclyde
